

CIVA High School

June 2011,

Dear Carol,

Since starting the Quantum Learning training series in 2008 our test scores have increased dramatically in reading and writing on Colorado's CSAP test.

Additionally, there has been a huge shift in our school since we began implementing Quantum Learning and the 8 Keys of Excellence over the past two years.

Discipline problems are next to none. Teachers are keeping kids so engaged they don't have time or interest in getting into trouble.

The 8 Keys are so easy to use. They mean something on their own and then we incorporate them throughout the year. Students understand them and really like them. They support each other and talk about Living above the Line with each other

The cultural shift has been incredible: 82% reduction in teacher disciplinary referrals.

Our classrooms are more engaging resulting in better academic performance and a more positive culture. We're also looking forward to our upcoming Quantum Learning Parent Involvement Workshop and Implementation Workshop. Quantum Learning is transforming our school.
